

ARTIKULAT

SPECIFICATION

A gorgeous, high performance stereo or multi-channel loudspeaker system

KEY FEATURES

- Linn enhanced 3K Driver Array* creates a consistent single-point source independent of cabinet type
- AKTIV** Servo-Driven Bass System
- CHAKRA power amplifier topology powering all full-range models
- All full-range models are available in passive with AKTIV bass, fully integrated AKTIV or External AKTIV upper frequencies
- A cast metal stand provides a solid, stable foundation for the floorstanding ARTIKULAT 350 and in conjunction with a column, supports the compact ARTIKULAT 320 and centre channel ARTIKULAT 340
- Natural laminate curved cabinet
- Available in a range of standard and special real wood veneer finishes

ARTIKULAT is a new high-performance loudspeaker system from Linn which combines stunning performance with gorgeous looks. Through four distinct, sonically and aesthetically matched loudspeakers ARTIKULAT delivers expressive and totally communicative playback.

The system consists of the following models that can be simply configured for high performance stereo and multi-channel music or home-theatre applications:

- 350 / 350A Floorstander
- 320 / 320A Compact
- 340 / 340A Centre Channel
- 345 Bass Reinforcement

ARTIKULAT features a range of proprietary Linn technologies including AKTIV Servo Bass, which delivers pure, musical bass reproduction to below 20 Hz. The enhanced 3K Driver provides exceptionally wide and uniform, horizontal and vertical dispersion.

The new Linn CHAKRA high-efficiency power amplification topology is present in full-range models and ensures greater reliability, greater efficiency, more power and outstanding sound quality with increased consistency of sound. CHAKRA amplification also features Linn's Switch Mode Power Supplies and facilitates fully integrated AKTIV configuration (denoted by the 'A' following the number of the model, e.g. 350A) for improved performance in comparison to passive set-up.

The cabinets used throughout the range are made of a complex natural laminate which is formed under pressure using custom tools. This process has enabled us to achieve the stunning and discreet form that characterises the range whilst ensuring an exceptionally rigid construction with ultra-low resonance.

High-grade real wood veneers are used throughout the range – standard finishes include Maple, Cherry, Black Ash and Rosenut.
